

KinderConnect – Download Authenticator Application

Before registering, Providers must download and install an authenticator application on their smartphone.

Note: You will need to use the app and enter a verification code each time you log in to your KinderConnect account.

iPhone:

- A** Tap the App Store icon on your smartphone home screen.
- B** In the search field, type **Authenticator app** and tap .
- C** The most used are the **Microsoft Authenticator** and **Google Authenticator** apps.

Microsoft Authenticator

Google Authenticator

Locate one of the apps, then tap **Get**. Depending on your device, either double-click your home button or tap **Get** to Install. If your smartphone asks you to sign into the iTunes Store, enter your Apple ID, password, and tap **OK**.

- D** Once the download is complete, tap **Open**.
- E** Follow the steps in the app to create an account.

Note: Any email can be used with the free authenticator apps. You are not required to have a Google or a Microsoft account.

Android:

- A** Tap the Play Store icon on your smartphone home screen.
- B** In the top search field, type **Authenticator app** and tap .
- C** The most used are the **Microsoft Authenticator** and **Google Authenticator** apps.
