

KinderConnect – Edit Region Settings

Use the **Admin > Region Settings** page to create and design messages to broadcast to users specific to Regions after logging in.

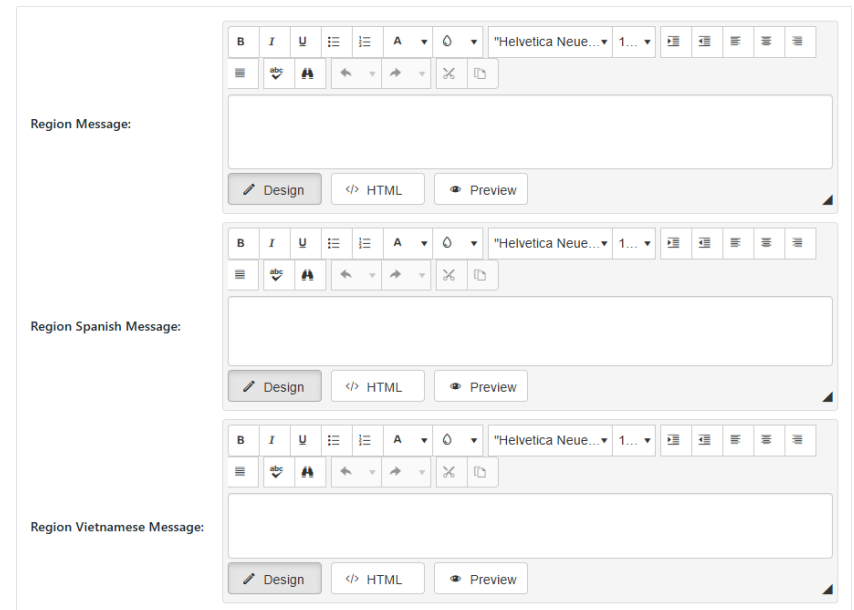

A Press **Region Settings** under **Admin**.

B Press the **Region** drop-down arrow to select the region the message applies to.

C Enter the **Region Message** that you would like to broadcast to all providers in that region. Note: we recommend that the message is entered in all three languages.

A screenshot of the Region Message editor. It shows three identical input fields for 'Region Message', 'Region Spanish Message', and 'Region Vietnamese Message'. Each field has a rich text editor toolbar above it with options for bold, italic, underline, text color, background color, font size, and font family. Below each field are buttons for 'Design', 'HTML', and 'Preview'.

D Once done press **Save**.
