

KinderConnect – Edit Site Settings

Maintenance and system setup tasks of KinderConnect are managed in the Admin activity. It is also used to manage the overall appearance and functionality of KinderConnect.

Note: The field values on this page are set during deployment and cannot be changed while others can be modified by the System Administrator.

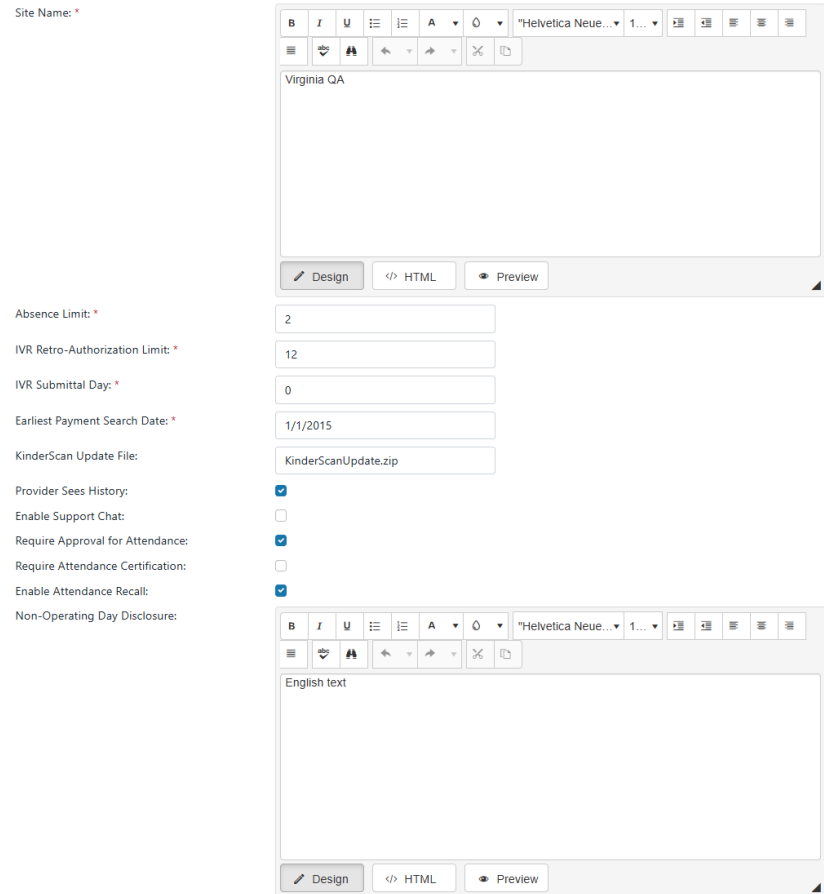

A Press **Site Settings** under **Admin**.

B Make the necessary changes. Required fields are marked by a **red asterisk (*)**.

Note: It is best to seek assistance from the technical KinderSystems support to change these settings.

General Settings

A screenshot of the 'General Settings' page. The page is divided into two columns. The left column contains various settings, some marked with a red asterisk (*). The right column contains two rich text editors. The top editor is titled 'Virginia QA' and the bottom one is titled 'English text'. Both editors have a toolbar with options for bold, italic, underline, list, link, font color, background color, and text color. Below the editors are buttons for 'Design', '</> HTML', and 'Preview'.
